Objective

Full-stack developer with hands-on experience in ASP.NET MVC, C#, SQL Server and JavaScript. I currently work at Dreams Network & Technology, where I build and deploy web applications for real business use. I am looking for a role in a software company where I can keep learning and take on bigger projects.

Experience

Software Developer (January 2026 – Present)
Dreams Network & Technology Pvt Ltd, Karachi, Pakistan

- Working as a Full-Stack Developer, building and maintaining web applications using ASP.NET MVC, C#, SQL Server, JavaScript, HTML, CSS, and Tailwind.
- Developed and enhanced both front-end and back-end modules, ensuring scalable architecture and efficient application performance.
- Managed database design, optimization, stored procedures, and data integrity for multiple projects.
- Deployed, configured, and maintained applications on Microsoft IIS servers, handling production releases and environment setup.
- Collaborated with cross-functional teams to gather requirements, implement features, troubleshoot issues, and deliver business-critical solutions.

Software Developer Intern (July 2025 – January 2026)
Dreams Network & Technology Pvt Ltd, Office # SR-10 Ground Floor, Anum Estate Building, Shahrah-e-Faisal, Karachi, Pakistan

- Rebuilt the company's most complex ERP system from scratch, replacing the old outdated system with a faster, better optimized and scalable version.
- Connected IoT devices and created energy and sensor monitoring dashboards, and learned about different IoT devices and protocols.
- Worked with senior developers to analyze business requirements, debug issues, and improve system performance.

Education

Bachelor of Science in Computer Science (BSCS) | 2026 – Present
Virtual University of Pakistan (VU)

ACCP AI Diploma | 2024 – Present
Aptech Learning SFC, Karachi

Intermediate (FSc Pre-Engineering) | 2021 – 2023
Government Graduate College Fort Abbas, Pakistan
Grade: B

Matriculation (Science) | 2019 – 2021
Al-Umer Public School, Fort Abbas, Pakistan
Grade: A+

Projects

Full Stack Projects

Smart Society – Society Management Platform

GitHub link: juttt270/ContestAzm-26 (github.com)

SITE LIVE ON → SmartSociety

- A full-stack platform to manage a residential society, with notices and polls, events, amenities, guidelines and an emergency SOS feature.
- Built the frontend in React with Tailwind CSS and the REST API with Node.js, Express and MongoDB, using JWT authentication, QR codes and PDF / Excel export.

Skill Swaps – Skill Exchange & Collaboration Platform

GitHub link: juttt270/Skill_Swap (github.com)

- A full-stack platform where users can exchange skills, connect with others, and collaborate through a structured skill-swapping system.
- Designed and developed a modern, responsive UI with a smooth user experience for skill browsing and profile management.

E-Greeting Cards Web Application

GitHub link: juttt270/E-GreetingCards (github.com)

SITE LIVE ON → EGreetingCards

- Designed and developed a web-based greeting card management system using **ASP.NET MVC and SQL Server**, following industry-standard MVC design patterns.
- Built features such as card management, database-driven content handling, and responsive front-end interfaces, improving application usability and performance.

Lawyer Management System – Lawyer Booking & Appointment Platform

GitHub link: juttt270/Book_Lawyers (github.com)

- A full-stack web application that allows users to search, view, and book lawyers based on category and availability.
- Implemented key modules such as lawyer listing, booking workflow, and client-side UI with clean navigation.

Event Management System – Event Planning & Registration Platform

GitHub link: juttt270/EventManagement (github.com)

- Developed a web-based system to manage events, handle registrations, and maintain event details in an organized way.
- Focused on a responsive frontend with user-friendly forms and structured layout for event listings.

Tour Packages & Guider System – Travel Booking & Guide Platform

GitHub link: juttt270/ExpenseVoyaga (github.com)

- Built a web application for exploring tour packages and connecting users with guides for travel planning.
- Designed a clean UI to showcase packages, details, and booking-related pages for a better customer experience.

UI / Frontend Projects

ERP Frontend Dashboard – Admin Panel UI

- Designed and developed an ERP-style frontend interface with a professional dashboard layout and reusable UI components.
- Focused on responsive design, clean navigation, and modern user experience.

E-Commerce Website UI – Multi-Category Store (Laptops, Mobiles & Electric Appliances)

GitHub link: juttt270/Waqas-portfolio/E-Project OceanGate (github.com)

- Developed a responsive e-commerce frontend with product listings, categories, and product detail pages.
- Implemented clean UI structure with modern layout and smooth browsing experience.

Sales Dashboard – Analytics & Charts UI

GitHub link: juttt270/Waqas-portfolio/Sales_Dashboard (github.com)

- Built a responsive dashboard with Chart.js charts for orders, customers, products and reviews, using Bootstrap and JavaScript.
- More websites and mini-apps (salon, travel and product sites, calculator, Tic-Tac-Toe) are on my portfolio website.

Shopify Project

TechCart.pk – E-Commerce Store (Network & IT Products)

- Developed and customized a Shopify e-commerce store for network and IT products.
- Worked on theme customization, store layout, product presentation, and overall UI optimization for better user experience.

Skills

- **Programming Languages**: C#, JavaScript, TypeScript, PHP
- **Front-End Technologies**: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js
- **Back-End Technologies**: ASP.NET MVC, ASP.NET Web Forms, Node.js, Express.js, Laravel
- **Databases**: SQL Server, MySQL, MongoDB
- **CMS & E-Commerce Platforms**: WordPress, Shopify
- **Tools & Technologies**: Git, GitHub, IIS Deployment, REST APIs, Entity Framework
- **Core Concepts**: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), MVC Architecture, Database Design, CRUD Operations
